Instructions

MARGARITA MACHINE

Operating Instructions

- Make sure that the barrel is locked down before filling. This will prevent severe leaking.
- Allow the unit 6 inches of free space in order for proper air flow.
- Pour 1 gallon of Sun Rental mix into unit. Mix can be refrigerated before hand.
- Fill with 2 gallons of cold water.
- Start the machine.
- Add alcohol after the drink has slushed. Don't add before hand because the drink will not freeze.

Cleaning Instructions

- Drain excess liquid from the machine.
- Fill machine up with clean water, and drain.
- Wipe down outside of unit with a damp cloth.
- Do not disassemble.

Helpful Hints

- Do not operate the unit when the drink is below the minimum level. Either add more drink mix, or shut the machine off.
- Plug the machine directly into an outlet. Do not use an extension cord.
- If you have more than one machine, plug them into separate circuits. If they are not on separate circuits the machines wont get cold enough and the drink mix wont slush. A different circuit doesn't mean a different outlet.
